Weight | Kg*
Units per box | 2
Box Weight | Kg*

Installation - Mechanical

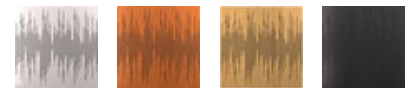

Packing Dimensions - 640x385x640mm

* Approximate weight

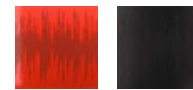

Description

Usually the most noticeable problems in a recording or post-production studio are caused by low frequencies, and are often overlooked in traditional acoustic treatments. The Athos Bass trap HP effectively treats low frequencies between 45Hz and 250Hz (tuned to 85Hz). It is a high performance treatment for low frequencies, designed to be placed in corners for maximum efficiency. Made from wood, from a sustainable and renewable source, it's unique design is a welcome addition to any space. Athos line is the latest addition to our Pro Audio range. This striking panel displays the signature design of Artnovion's founder and CEO Jorge Castro.

Product finishes:

Blanc Cerise Marron Noir

Rouge Wenge
