

## Avalon Flow | Concept

Absorption  
RESIDENTIAL & Hi Fi

### Description

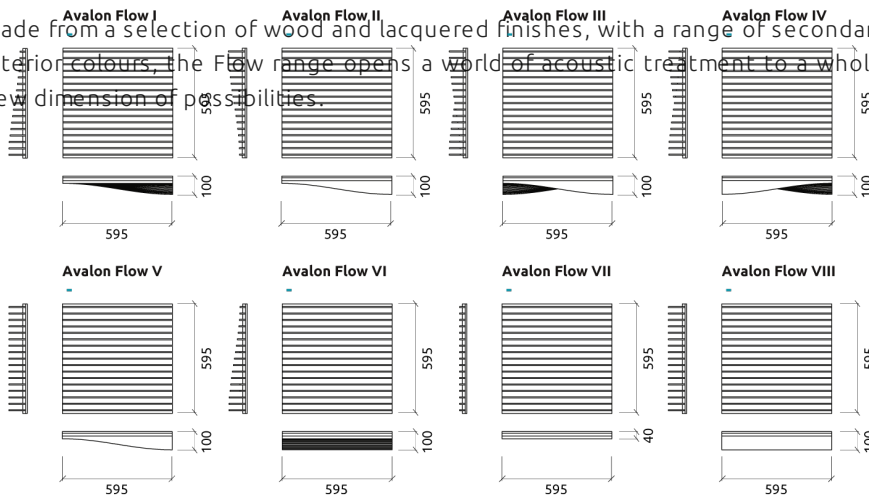

Flow is a new line of hybrid panels - combining a high-performance acoustic core with a carefully calibrated diffuser design. This dual functionality breaks away from the old-school parameters of acoustic design, creating new paths to solve excessive reverberation and uneven sound fields.

The acoustic cores are formed by strategically interwoven acoustic foam with Helmholtz resonators, layered over an encompassing sealed air cavity. The parallel slats diffuse incoming waves, creating a uniform reflection pattern and homogenous sound fields. All tweaked to pack the most performance in the minimum space possible.

The most striking facet of this panel are the design possibilities. The panels parametric design turns simple panels into a pattern that flows along the walls, according to your point-of-view.

### Technical Information

Made from a selection of wood and lacquered finishes, with a range of secondary interior colours, the Flow range opens a world of acoustic treatment to a whole new dimension of possibilities.

### Performance

### Specifications

FG (Furniture grade)

Finishes: Lacquered | Wood Veneer
