

**VIDEOTREE**

*Luxury Technology. Bespoke Solutions*

# It started with a vision.

Videotree are the pioneers in waterproof television technology. Since our foundation over 10 years ago, we have developed a range of quality, luxurious waterproof, mirror and outdoor televisions.

Designed and built in the UK, Videotree televisions are manufactured to an IP66 rating – fully protected against moisture and dust for installation in any environment.

Using the latest 3D technology, each Videotree television is carefully designed and built to exacting standards by our team of highly-skilled technicians, integrating the latest television technology into a sleek, slim-line television module. Videotree TVs come with a wide range of inputs including optional IP connectivity - ideal for a variety of professional environments.

Videotree offer versatile solutions for a range of environments. Our waterproof Lifestyle range are ideal for installation within wet or damp environments such as bathrooms, en-suites, spas and pool areas. Our Outdoor televisions are ideal for outdoor kitchens, seating areas and outdoor events, whilst our Mirror range allows users to seamlessly integrate their television into their home without compromising on design.

# Versatile integration.

Videotree televisions are designed with seamless installation in mind. VESA compatible fixings and thorough installation guides are provided with each television to ensure the simplest of installation however you choose to mount your television. Every Videotree television is supported by a team of technicians who understand the ins and outs of each module.

With a range of finishes, framing, mounting, IPTV connectivity and speaker options, Videotree televisions can be tailor-made to suit your needs - the most versatile solution on the market.

### Benefits to integrators:

- **Simple Installation** with detailed installation guides & VESA compatible fixings
- **One Complete Module** - minimal parts for simpler installation
- **Consistent Design** - no worry about continual modifications
- **Multiple Port Connectivity** - wide range of inputs
- **Optional IP Connectivity** - ideal for use in hospitality or office environments
- **Full Connectivity to the Hotel IPTV System** - with just one CAT5 cable
- **No Separate Set Top Receivers (STBs)** - one TV, one power supply

### MARINE

Space-saving ideas with luxurious finishes. Why not complement your yacht's interior with a mirror television, or keep guests entertained on deck with an outdoor television? Save space without compromising design.

### HOME

Remodelling your home? Installing a bathroom or mirror television not only adds a splash of luxury, it also enables the seamless integration of entertainment technology into even the smallest of spaces.

### HEALTH SPAS & LEISURE CENTRES

Videotree televisions are IP66 rated for the ultimate protection against moisture and dust - perfect for installation in damp environments such as pool areas, spas and saunas. Keep your clients entertained and informed wherever they are.

### HOSPITALITY

Add that luxurious feel to any guest bedroom, bathroom, seating or outdoor area with a Videotree bathroom or mirror television and give your guests a truly unique experience.

# Luxury entertainment.

### INDUSTRIAL PANEL

Industrial panels provide up to 4 times the contrast ratio of standard televisions and around 60,000 hours usage life.

### THINNEST ON THE MARKET

Measuring as little as 41mm in depth, Videotree televisions maintain a sleek finish, whether you opt for on-wall, in-wall or behind-glass installation.

### GUARANTEED FOR 2 YEARS

Every Videotree television is fully guaranteed with a 2 year manufacturer warranty. Quality is our top priority which is why every television undergoes strict testing and quality control procedures during the manufacturing process.

### MADE IN BRITAIN

Videotree televisions are designed and manufactured in the UK by an expert team of engineers and technicians for outstanding quality with every build. Our products now proudly bear the 'Made in Britain' marquee.

### RANGE OF FINISHES AVAILABLE

Videotree televisions can be installed with a variety of mounting options and our Outdoor and Mirror televisions are available in a range of glass finishes with bespoke frames to suit your design requirements.

### IP66 PROTECTION RATING

Our Lifestyle and Outdoor televisions are built to an IP66 rating to provide complete protection against moisture and dust, assembled in our very own clean room to ensure no ingress during the manufacturing process.

### MULTIPLE PORT CONNECTIVITY

Videotree's specially designed control system provides a wide range of inputs including 3 x HDMI ports, PC, Component, RGB, RS232 and IR in and out. Optional IP connectivity and integrated Set Top Boxes (STBs) enable connection to a wide range of services.

# Powerful technology.

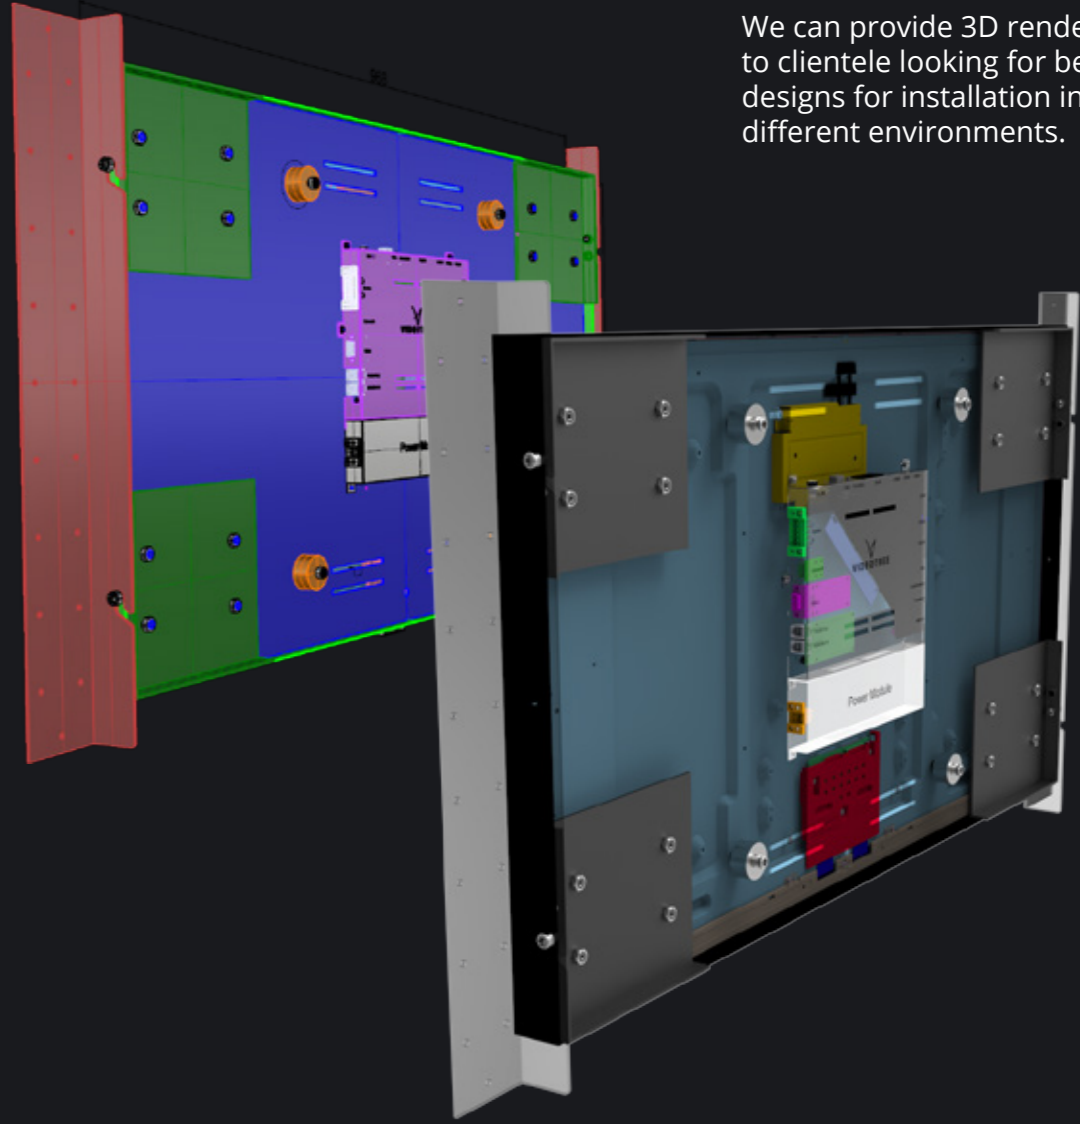

Videotree televisions are designed using the latest 3D software right here in the UK. Each television is carefully designed and critiqued down to the very last detail to ensure they maintain their sleek, sophisticated style whilst integrating the most powerful television technology.

Our IP66 rated models are completely protected against moisture and dust allowing installation in a wide range of environments, whilst each television is built in our very own clean room to ensure no ingress during the manufacturing process.

Standard-sized televisions are supplied with a splashproof remote control and our larger televisions are provided with a waterproof remote control - the most hygienic solution - alongside VESA compatible mounting options for simple installation.

Each Videotree television is designed by our specialist team of technicians to provide our engineers with precise, detailed drawings for manufacture.

We can provide 3D rendered images to clientele looking for bespoke designs for installation in a range of different environments.

# Mirror range.

With the touch of a button, each beautifully reflective mirror transforms into a stunning television with a high-brightness, full HD screen for perfect viewing every time.

Videotree Mirror televisions can be integrated into a range of environments for a variety of industries including marine, hospitality, leisure and health resorts. With optional IP connectivity, each mirror television can link to new or existing services and can also provide cost-effective digital signage solutions.

Mirror screens can be made to almost any size with a standard viewing area. Whether you are looking for a small vanity bathroom mirror, a framed mirror for your dining room, or larger commercial LED panels, our high-brightness, high-contrast screens display perfect picture quality whatever the size, whatever the condition.

All models come with a definitive sound system, hidden glass exciters and individual speaker bars - all of which can be tailored to your requirements.

With a range of finishes, framing, mounting, IPTV connectivity and speaker options, Videotree mirror televisions can be tailor-made to suit your needs - the most versatile solution on the market.

## GAPLESS SCREEN

Disguising a standard television behind a mirror frame can lead to an array of technical problems. That's why our industrial panels are bonded directly to the mirror glass, avoiding double vision and maintaining picture clarity and quality.

## BORDERLESS VIEWING AREA

The only framed mirror televisions on the market where the viewing area meets the very edge of the mirror glass, leaving no surrounding dark border.

## DIELECTRIC MIRROR GLASS

Videotree Mirror televisions use only the finest dielectric glass, leaving no gap between the television screen and the mirror glass for perfect viewing when the television is on and up to 75% reflection when the television is off.

## INDUSTRIAL PANEL

Industrial panels provide up to 4 times the contrast ratio of standard televisions and around 60,000 hours usage life.

**Elegant.**  
Seamless design.

# Outdoor range.

Videotree Outdoor televisions provide luxurious entertainment in a variety of outdoor spaces.

Videotree's elegantly designed Outdoor televisions boast an extensive range of features including an anti-glare, high brightness screen for clear viewing in any condition, an IP66 rating to provide the ultimate protection against dust, moisture and insects and a patented design to provide fanless temperature management. With a range of bespoke framing and mounting options, Videotree's outdoor televisions can be custom designed to complement your outdoor space.

Videotree Outdoor televisions are not only suitable for gardens and pool areas, they can also provide stylish digital signage for pubs, bars and restaurants whilst keeping guests entertained at a range of outdoor events including weddings, parties and concerts.

Now you can enjoy your favourite programmes outdoors in any climate.

## INDUSTRIAL PANEL

Industrial panels provide up to 4 times the contrast ratio of standard televisions with around 60,000 hours usage life.

## THINNEST ON THE MARKET

Measuring as little as 42mm in depth, Videotree Outdoor televisions maintain a sleek, slim-line finish.

## FANLESS COOLING SYSTEM

Videotree's patented temperature management system eliminates the need for internal fans, providing operation in temperatures ranging from -5°C to 50°C\* whilst allowing for a sleek design and near silent operation.

## IP66 PROTECTION RATING

Our Outdoor range of televisions are IP66 rated to provide complete protection against moisture, dust and insects - built in our very own clean room to ensure no ingress of contaminants during the manufacturing process.

## ANTI-GLARE SCREEN

Videotree screens are protected with an anti-glare, toughened glass coating suitable for outdoor environments. High-brightness screens are available up to 1800 NIT to enable perfect viewing in the sunniest of settings.

# Versatile. Entertainment anywhere.

\*Optional internal heater available for operating temperatures below -5°C.

# Lifestyle range.

Videotree's range of Lifestyle televisions offer versatile solutions for a variety of wet and damp environments.

Each Lifestyle television is hand-built right here in the UK to a strict IP66 rating, providing complete protection against moisture and dust. Industrial panels provide high-brightness, high-contrast images for stunning clarity with a long usage life even in warm, damp environments.

With multiple ports, optional IP connectivity and STB integration, Videotree Lifestyle televisions are ideal for the hospitality industry and many of our Lifestyle televisions can already be found in some of the world's most luxurious hotels and spas.

Lifestyle televisions can be mounted on-wall or in-wall for a fully flush, sleek finish. Accompanied by optional in-wall ceiling speakers, our Lifestyle range can create the ultimate cinematic experience in the very heart of your home.

## INDUSTRIAL PANEL

Industrial panels provide up to 4 times the contrast ratio of standard televisions with around 60,000 hours usage life.

## THINNEST ON THE MARKET

Measuring as little as 41mm in depth, Videotree televisions maintain a sleek finish, whether you opt for on-wall, in-wall or behind-glass installation.

## IP66 PROTECTION RATING

Our Outdoor range of televisions are IP66 rated to provide complete protection against moisture and dust - built in our very own clean room to ensure no ingress of contaminants during the manufacturing process.

## MULTIPLE PORT CONNECTIVITY

Videotree's specially designed control system provides a wide range of inputs including 3 x HDMI ports, HDMI, PC, Component, RGB, RS232 and IR in and out. Optional IP connectivity and integrated Set Top Boxes (STBs) allow connection to a wide range of services.

**Powerful.**  
**Hidden technology.**

# Elegant design.

Each Videotree television can be tailored to suit your specific design requirements. Videotree offer a range of bespoke finishes to ensure your television meets even the highest of standards when it comes to interior design, including coloured and tinted mirror glass, a range of mounting options and a selection of stunning picture frames.

## AVAILABLE FINISHES:

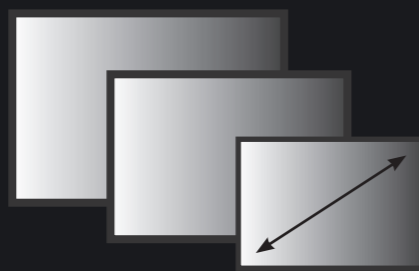

- Framed, floating, behind-glass, in-wall or on-wall mounting
- Range of behind-glass viewing areas, from 18.5" up to 85"
- Silver or colour-tinted mirror glass
- Array of handmade picture framing options
- Touch Tile control panel (optional extra)

Handmade frames are available for Outdoor and Mirror TVs in a choice of styles ranging from intricate antique frames to modern, sleek or fabric frames.

Select from a range of colour anodised metal framework for unframed Lifestyle televisions.

Mirror TV viewing areas are available in a range of standard sizes.

Mirror glass is available in almost any size, dependent upon the type of glass used.

# Optional extras & accessories.

Each television is supplied with a splashproof Master Remote Control and Learning Remote Control for use in any environment. The Learning Remote Control can be programmed to control several electronic devices by searching for one of many pre-set manufacturer codes, or by simply 'learning' the codes from your original remote control using the infra-red sensors.

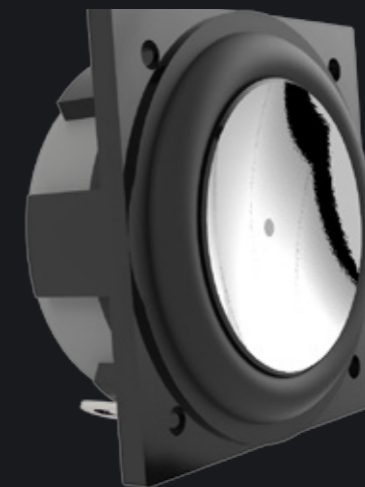

For a truly sleek finish, Videotree's Touch Tile control panel can be integrated behind any wall tile using the latest technology to provide effortless touch control whilst retaining the design of any room. Completely waterproof, the Touch Tile is ideal for use in bathrooms and spa areas.

Optional in-wall speakers can amplify your television audio without compromising on design, with simple installation to fit fully flush to any surface. Seamlessly integrate these in-wall speakers into any surface for a truly cinematic experience.

Each television can be modified for IPTV connectivity, ideal for hotels, restaurants, offices and leisure centres. Whether you want to connect to existing services or simply require a digital signage solution, IP-enabled televisions are the most stylish option available.

## VIDEOTREE TOUCH TILE

Laser-etched, behind-wall touch-sensitive control panel. Install a standard black glass Touch Tile or create your own by simply providing one of your own bathroom tiles for modification.

## IN-WALL SPEAKERS

Waterproof speakers fit fully flush to most surfaces to amplify your television audio. A compact, quality solution for home and professional use.

## IP CONNECTIVITY

Connect to existing IPTV services or simply create a new digital signage solution with optional IP connectivity with every Videotree television.

Sophisticated, discreet and technically brilliant, Videotree televisions are the ultimate in waterproof, outdoor and mirror television technology. Developed from the original concept over 10 years ago, our newest range of televisions boast boosted performance, stunning visual imagery and a sleek design to provide our clients with the most sophisticated display solutions.

Powerful television technology is cleverly concealed behind each slim-line module, providing dazzling full HD LED displays with over 70 digital channels from a standard TV aerial, a range of inputs and outputs and optional IP connectivity.
