Luxury Technology. Bespoke Solutions

Mirror Television Range

Luxury entertainment.

BORDERLESS VIEWING AREA

The only framed mirror televisions on the market where the viewing area meets the very edge of the mirror glass, leaving no surrounding dark border.

GAPLESS SCREEN

Disguising a standard television behind a mirror frame can lead to an array of technical problems. That's why our industrial panels are bonded directly to the mirror glass, avoiding double vision and maintaining picture clarity and quality.

INDUSTRIAL PANEL

Industrial panels provide up to 4 times the contrast ratio of standard televisions with up to 60,000 hours usage life.

THINNEST ON THE MARKET

Measuring as little as 41mm in depth, Videotree televisions maintain a sleek finish, whether you opt for on-wall, in-wall or behind-glass installation.

DIELECTRIC MIRROR GLASS

Dielectric glass enables stunning clarity when the television is on and up to 75% reflection when the television is off.

GUARANTEED FOR 2 YEARS

Every Videotree television is fully guaranteed with a 2 year manufacturer warranty. Quality is our top priority which is why every television undergoes strict testing and quality control procedures during the manufacturing process.

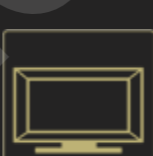

MADE IN BRITAIN

Videotree mirror televisions are designed and manufactured in the UK by an expert team of engineers and technicians for outstanding quality with every build.

RANGE OF FINISHES AVAILABLE

Our mirror televisions are available in a range of glass finishes with bespoke framing options to suit any interior.

Luxurious.
Entertainment anywhere.

Versatile integration.

With the touch of a button, each beautifully reflective mirror transforms into a stunning television with a high-brightness, full HD screen for perfect viewing every time.

Videotree Mirror televisions can be integrated into a range of environments for a variety of industries including marine, hospitality, leisure and health resorts. With optional IP connectivity, each mirror television can link to new or existing services or provide cost-effective digital signage solutions.

Standard-sized televisions are supplied with a splashproof remote control and our larger televisions are provided with a waterproof remote control - the most hygienic solution - alongside VESA compatible mounting options for simple installation.

All models come with a definitive sound system, hidden glass exciters and individual speaker bars - all of which can be tailored to your requirements.

With a range of finishes, framing, mounting, IPTV connectivity and speaker options, Videotree mirror televisions can be tailor-made to suit your needs - the most versatile solution on the market.

MARINE

Space-saving ideas with luxurious finishes. Why not complement your yacht's interior with a mirror television? Save space without compromising design.

HOME

Remodelling your home? Installing a mirror television not only adds a splash of luxury, it also enables the seamless integration of entertainment technology into even the smallest of spaces.

HEALTH SPAS & LEISURE CENTRES

Videotree televisions are IP66 rated for the ultimate protection against moisture and dust - perfect for installation in damp environments such as pool areas, spas and saunas. Keep your clients entertained and informed wherever they are.

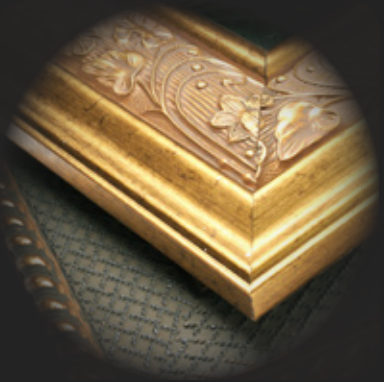

HOSPITALITY

Add that luxurious feel to any guest bedroom, bathroom, seating or outdoor area with a mirror television and give your guests a truly unique experience.

Versatile. Sleek integration.

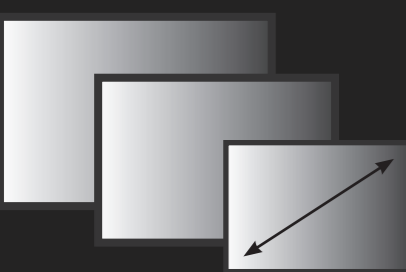

Elegant design.

Handmade frames in a choice of styles ranging from intricate antique frames to modern, sleek or fabric frames.

Choice of colour anodised metal framework for unframed mirror televisions.

Viewing areas are available in a range of standard sizes.

Mirror glass is available in almost any size, dependent upon the type of glass used.

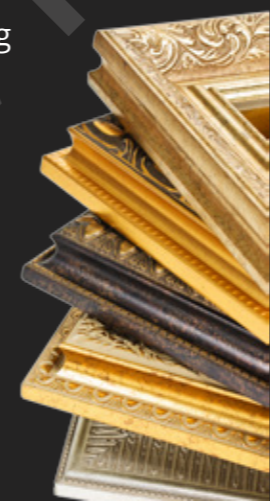

Each Videotree Mirror television can be tailored to suit your specific design requirements.

Mirror screens can be made to almost any size with a standard viewing area. Whether you are looking for a small vanity bathroom mirror, a framed mirror for your dining or living room, or larger behind-glass installations,, our high-brightness, high-contrast screens display perfect picture quality whatever the size, whatever the condition.

Videotree offer a range of bespoke finishes to ensure your mirror television meets even the highest of standards when it comes to interior design, including coloured and tinted mirror glass, a range of mounting options and a selection of luxurious picture frames.

FINISHES AVAILABLE:

- Range of viewing areas, from 18.5" up to 85"
- Silver or colour-tinted mirror glass
- Framed, floating, in-wall or on-wall mounting
- Array of handmade picture framing options
- Touch Tile control panel (optional extra)

Elegant. Seamless design.

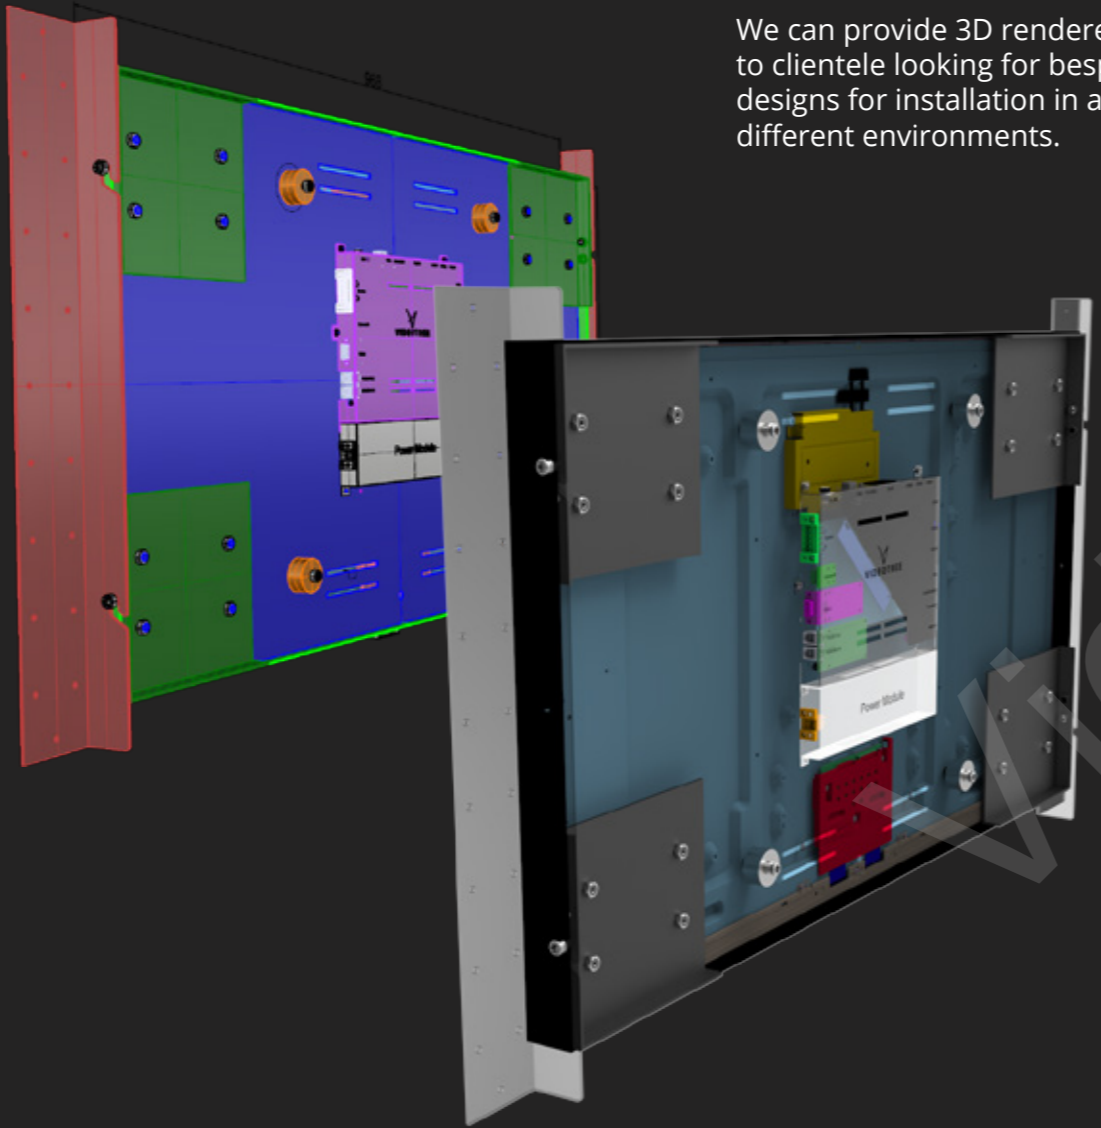

Powerful technology.

Videotree mirror televisions are designed using the latest 3D software right here in the UK. Each television is carefully designed and critiqued down to the very last detail to ensure they maintain their sleek, sophisticated style whilst integrating the most powerful television technology.

Videotree use only the finest dielectric glass for their mirror television modules, leaving no gap between the television screen and the mirror glass for perfect viewing when the television is on and a stunning reflection when the television is off.

When it comes to installation, Videotree are the installer's choice. However you choose to mount your mirror television, Videotree aim to provide the simplest of installation with VESA compatible fixings and thorough installation guides provided with each television.

Each Videotree television is designed by our specialist team of technicians to provide our engineers with precise, detailed drawings for manufacture.

We can provide 3D rendered images to clientele looking for bespoke designs for installation in a range of different environments.

Powerful.
Hidden technology.

Optional extras & accessories.

Each Mirror television is supplied with a splashproof Master Remote Control and Learning Remote Control for use in any environment. The Learning Remote Control can be programmed to control several electronic devices by searching for one of many pre-set manufacturer codes, or by simply 'learning' the codes from your original remote control using the infra-red sensors.

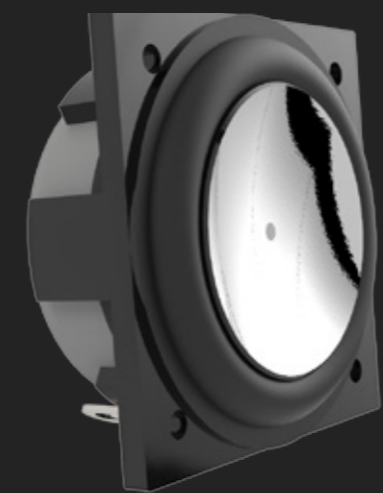

For a truly sleek finish, Videotree's Touch Tile control panel can be integrated behind any wall tile using the latest technology to provide effortless touch control whilst retaining the design of any room. Completely waterproof, the Touch Tile is ideal for use in bathrooms and spa areas.

Optional in-wall speakers can amplify your television audio without compromising on design, with simple installation to fit fully flush to any surface. Seamlessly integrate these in-wall speakers into any surface for a truly cinematic experience.

Each television can be modified for IPTV connectivity, ideal for hotels, restaurants, offices and leisure centres. Whether you want to connect to existing services or simply require a digital signage solution, IP-enabled mirror televisions are the most stylish option available.

VIDEOTREE TOUCH TILE

Laser-etched, behind-wall touch-sensitive control panel. Install a standard black glass Touch Tile or create your own by simply providing one of your own bathroom tiles for modification.

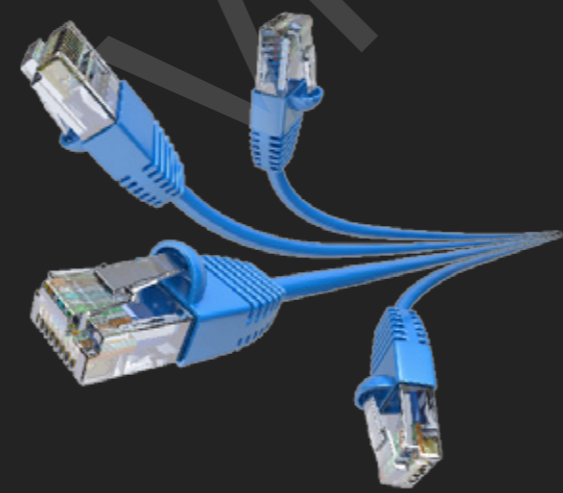

IN-WALL SPEAKERS

Waterproof speakers fit fully flush to most surfaces to amplify your television audio. A compact, quality solution for home and professional use.

IP CONNECTIVITY

Connect to existing IPTV services or simply create a new digital signage solution with optional IP connectivity with every Videotree television.
